

This list is organized according to the American Ornithologists Union groupings and has been compiled from annual Winter and Spring birdcounts. There has been no data collected during the Summer and Fall. It is our wish to create a truly useful bird check list for this geographic area which includes Malcolm Island and the waters that surround it. Suggested corrections and sightings of species not included on this list and the results of any birding activities using this list would be greatly appreciated. Please contact mibc@island.net with your ideas.
